

The “BILC Military Glossary for Civilian English Teachers & Translators” is a monolingual glossary intended as a support for civilian English teachers and translators in a military environment. Neither is it an authoritative NATO document, nor is it to replace any of the existing NATO STANAGs on terminology. On the contrary, it is intended to complement existing documents, because it also covers terminology not necessarily covered by standardized NATO glossaries.

Preface

The “BILC Military Glossary for Civilian English Teachers & Translators” is a monolingual glossary intended as a support for civilian English teachers and translators in a military environment. It was compiled by the BILC Working Group on Terminology and Translation headed by Austria. In 2012, the Working Group emerged from a Study Group on the same topic, also initiated and headed by Austria, at the BILC Conference in Vilnius 2011. The glossary contains terminology extracted from two basic NATO-documents: ATP-3.2.1 “Allied Land Tactics” (2009) and AJP-01 (D) “Allied Joint Doctrine” (2010). The terms were extracted by national sub working groups, i. e. by English teachers from various BILC member countries. The task was to look at the texts “with the eyes of a civilian” not familiar with the military, and to collect the terms the meaning of which was unclear to them. As a next step a definition had to be added, either from the source text itself or from one of the authoritative NATO STANAGs concerned with terminology (e. g. AAP-6). In case no definition could be found in any of the official NATO STANAGs, the experts were requested to formulate definitions or explanations of their own. Then the results of the sub working groups were merged, redundancies were eliminated and definitions and explanations were added if necessary.

This glossary is not an authoritative NATO-document, nor is it intended to replace any of the existing NATO-documents on military terminology. However, STANAGs such as AAP-6 “NATO Glossary of Terms and Definitions” do not always cover the whole range of terminology needed by English teachers in a military classroom. The “BILC Military Glossary for Non-Military English Teachers & Translators” does not follow a systematic terminological approach, nor does it, in this first version, comprise terms from all relevant NATO documents. In the course of subsequent editions, additional terms from other source documents could be added and some systematic terminology work could be done in certain subject fields, if needed. However, in order to improve this glossary, the BILC Working Group on Terminology and Translation strongly relies on the comments and suggestions from the teachers using the glossary in the classroom and from the translators, using it as a complementary glossary.

axial route	ATP-3.2.1, Ch. 5
A route running through the rear area and into the forward area.	
Source of definition:	AAP-6

axis	ATP-3.2.1, Ch. 5
in land warfare, the general direction of movement, planned or achieved, usually between assigned boundaries	
Source of definition:	AAP-6

axis of advance	ATP-3.2.1 Chs 6 & 8
<p>A line of advance assigned for purposes of control; often a road or a group of roads, or a designated series of locations, extending in the direction of the enemy. An axis of advance symbol graphically portrays a commander's intention, such as avoidance of built-up areas or envelopment of an enemy force. It follows terrain suitable for the size of the force assigned the axis and is often a road, a group of roads, or a designated series of locations. A commander may maneuver his forces and supporting fires to either side of an axis of advance provided the unit remain oriented on the axis and the objective. Deviations from an assigned axis of advance must not interfere with the maneuver of adjacent units without prior approval of the higher commander. Enemy forces that do not threaten security or jeopardize mission accomplishment may be bypassed. An axis of advance is not used to direct the control of terrain or the clearance of enemy forces from specific locations. Intermediate objectives normally are assigned for these purposes.</p>

Source of definition:	AAP-6

battle drill	ATP-3.2.1, Ch. 1
A collective action rapidly executed without applying a deliberate decision-making process, in which a unit applies fire and manoeuvre to common situations of enemy combat (usually at squad/platoon level).	
Source of definition:	US FM 25-101

battle handover	ATP-3.2.1 Ch 6
A designated point (phase line) on the ground where responsibility transitions from the stationary force to the moving force and vice versa. It is within direct direct fire range and observed indirect fire range of the stationary force.	
Source of definition:	US FM 101-5-1

battle position	ATP-3.2.1 Ch 6
A defensive location oriented on the most likely enemy avenue of approach from which a unit may defend. Such units can be as large as battalion task forces and as small as platoons. A unit assigned a BP is located within the general outline of the BP. A battle position graphic control measure may be used independently or in combination with sectors. Security, combat support, and combat service support forces may operate outside a BP.

conventional warfare

AJP-01 (D)Chapter 2

Conventional warfare is a form of warfare conducted by using conventional military weapons and battlefield tactics between two or more states in open confrontation. The forces on each side are well-defined, and fight using weapons that primarily target the opposing army. It is normally fought using conventional weapons, and not with chemical, biological, or nuclear weapons.

main effort	ATP-3.2.1 Ch 6
The unit, battle position, sector, zone, axis, avenue of approach, area of operations, theater of operations, and so forth, the senior commander has determined has the most important	

task and purpose at that time, whose success will make the most difference in the accomplishment of the higher commander's overall mission or objective. Commanders at all levels should designate a point of main effort along with supporting efforts. This helps them and their staffs to allocate resources accordingly, providing focus to the operation while setting priorities and determining risks, promoting unity of effort, and facilitating and understanding of the commander's intent. There is only one main effort at any time in the operation, although the main effort may change as the situation changes to take advantage of opportunities or to avert failure. In the offense, the commander will conduct the main attack where the main effort has been designated. The unit(s) conducting the main attack normally will shift throughout the operation. The main attack may be a deep attacking unit, the point unit of the ground attack, or the reserve, when committed. In the defense, the main effort is that area along the enemy avenue of approach that the defense depends on for success. The higher commander will influence the main effort with supporting effort(s). For example, during World War II the European Theater was the national main effort and the Pacific theater was a supporting effort.
